

# EVALINE ARBOGASTI

## Software Developer | Full-Stack & Mobile Development

evelynearbogusti@gmail.com | +1 253-248-9390 | [github.com/EvaArbo](https://github.com/EvaArbo) | <https://evaline-arbogasti.vercel.app/>

### PROFESSIONAL SUMMARY

Software developer experienced in building and deploying full-stack web and mobile applications using React, React Native, Python/Flask, and PostgreSQL. Built REST APIs, database-backed features, authentication workflows, and production deployments. Experience supporting backend systems used by 500+ users and improving issue-resolution workflows.

### TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Frontend & Mobile: React, React Native, Expo, Expo Router, Vite, Responsive Web Design

Backend & APIs: Flask, REST APIs, SQLAlchemy, Flask-Migrate, Flask-Limiter, Authentication, CRUD, JSON, CORS

Databases & Services: PostgreSQL, Supabase, Resend

Tools & Deployment: Git, GitHub, Linux, VS Code, Vercel, Render, QR/Barcode Scanning

### EXPERIENCE

**Junior Software Developer Intern:** Bob Morgan Security Services | [Jan 2024-May 2024]

- Maintained and supported backend infrastructure serving 500+ users.
- Improved backend troubleshooting workflows and reduced issue-resolution time by 50%.

Supported day-to-day maintenance and reliability of internal application systems. **IT / Software Intern** | Bob Morgan Company | [Jan 2024-May 2024]

- Maintained IT systems and configured network and security devices.
- Supported technical operations and assisted with system and connectivity troubleshooting.

### PROJECTS

**Developer Portfolio:** React, Vite, Flask, PostgreSQL, SQLAlchemy, Supabase. Built and deployed a full-stack portfolio with a React frontend, Flask REST API, and PostgreSQL database.

- Implemented server-side validation, database persistence, resend email notifications, production CORS, and contact-form rate limiting.
- Deployed the frontend on Vercel and the Flask/Gunicorn backend on Render using environment-based configuration.

**Smart Inventory Management System (SIMS):** React Native, Expo, Expo Router, JavaScript

- Developed a mobile inventory application for managing organizational assets, users, permissions, and inventory requests.
- Implemented QR-code and barcode scanning workflows for asset tracking.

**Ludo Game** | JavaScript, Python, PostgreSQL | [ludo-game-ns8e.vercel.app](https://ludo-game-ns8e.vercel.app)

- Built a full-stack interactive Ludo game with game logic, player management, and database integration.  Separated frontend and backend responsibilities and deployed the application for live use.

### EDUCATION

**Diploma in Information Technology – Distinction-U.S. Equivalent associate degree** | Jomo Kenyatta University of Agriculture and Technology | Completed Nov 29, 2024

**Software Engineering Certificate (6 months)** | Moringa School | Completed
